Life

As organizations get bigger and jobs more spread, a sense of purpose for the individual is easily lost. Commenting on this, Mr. T. B. Brown, publisher of the Welding Engineer, says, "The tragedies of our times is the fact that people do not have an overriding purpose, ambition or a goal in what they are presently doing. Have you noticed how little enthusiasm people display for their work? 'It's a job.' 'It's just to do.' 'It makes me a living.' These seem to be their attitudes. What a terrible approach to life. We are told that 5 per cent of the people in this country will provide the leadership for the generation. Those leaders will come from people who have ambitions and goals in life. Do you?"

One of the most worthwhile goals which anyone has is to excel in whatever job he does. From personal satisfaction and almost inevitable monetary reward, there is another return of value which is virtually incalculable. Doing a job which it will be its own goal, and it can be of influence in making effective concerned citizens of the younger generation, part of which is probably raising in your own home.

He also made mention to members that in the first week of November the Sportsman's Club distributed 3000 booklets on "Clean Water" in reference to proposals 3 and 4 on the Nov. 5 ballot.

GEORGE N. BLAHA RECEIVES MASTERS

The University of Michigan Regents have confirmed the awarding of 2,373 degrees this summer to students being graduated from U-M's 17 colleges and schools. Among those awarded is a Master's in Business Administration to George Blaha, son of Dr. and Mrs. Vernon Blaha of Grayling.

Conservation Dept. Has Name Changed

LANSING — On Nov. 15, the Michigan Department of Conservation officially shed its 47 year old title and became the Department of Natural Resources.

The name change, signed into law by Governor Romney three months ago, is designed to reflect the Department's broadened, more dynamic role of both preserving natural resources and promoting their prudent use for the maximum public good.

It will mirror the Department's vastly widened scope of responsibilities which in recent years has been expanded to cover such areas of administration as tourism, water pollution control, aid to local recreation, waterways, and boat and water safety.

Workers at the Southern Michigan State Forest Nursery, Porcupine Mountains State Park, and Camp Sauble are in full swing turning out new signs and lettering panels for old ones which bear the Department's updated title. Their workload is a big one because there are several thousand existing signs at state parks, public access sites, state forest campgrounds, and other facilities throughout the state which carry the Department of Conservation wording.

As quickly as they come off production lines at the three sign shops, panels entitled "Department of Natural Resources" will be attached to these signs to block out the Department of Conservation designation.

Annual Report of City of Grayling

October 1, 1938

THE HONORABLE ALFRED J. SORENSON, MAYOR
MEMBERS OF THE CITY COUNCIL
CITY OF GRAYLING, CRAWFORD COUNTY, MICHIGAN

Gentlemen:

We have examined the balance sheets of the various funds of the City of Grayling, Michigan, as of June 30, 1938, and the related statements of operations for the fiscal year then ended. In our opinion, the accompanying balance sheets and related statements of operations present fairly the financial position of the various funds and balanced account groups for the City of Grayling, Michigan at June 30, 1938, and the results of their operations for the year then ended, in conformity with generally accepted accounting principles applicable to governmental entities, applied on a basis consistent with that of the preceding fiscal year.

Respectfully submitted,

CRAZY SUITCASE! Much to the amazement of Grayling High School students, Jim Corlow, Tri-County Christian and Mike Anthony a "no-hands" suitcase takes off for a spin of its own. The suitcase revolves on a turntable, one end in the air, during a science in action demonstration of gyroscopic principles which will someday guide space ships to the moon. This and other scientific wonders were dramatized in General Motors 45-minute assembly program Provinces of Progress which appeared at the school on Nov. 12.

A ROLLING TRIANGLE! As Grayling High School students Craig Vorlinda and Debbie Nethers look on, Provinces of Progress lecturer John C. Eldin demonstrates the Rosaleux Triangle. A mathematical oddity, the triangle on the left rolls as smoothly as the cylinder on the right. This was just one of eight science in action demonstrations seen by Grayling students when the General Motors assembly program Provinces of Progress appeared at the school on Tuesday, Nov. 12 at 2:20 p.m.

LESSON

THE CALL OF ABRAHAM

(Our lessons for the next two months)

1. Who was to keep the circumcision cov-
ant and how was it to be kept?
2. What was to happen to those who did
heed this command to be circumcised?
3. Why was the sign of circumcision giv-
to Abraham?

It was with the covenant sign of circum-
cision, the outward sign of the Old Testament
us fulfilled so there might be established an
outer circumcision of the heart.

4. The new covenant circumcision
ought a deeper meaning, Jesus fulfilled it.

All Bible scripture in these lessons will be
read in Bible study class. All reading from

County Supervisors Propose Interim Zoning Ordinance

By Willard Basserman,
County Extension Natural
Resource Agent

The Crawford County Board
of Supervisors are considering
the adoption of a county wide
interim zoning ordinance. One
of the primary purposes is to
enact a green belt zone to
protect the AuSable and Man-
istee river systems. This part
has been urged by the AuSable
River Watershed Study Council
and upper Manistee River Asso-
ciation.

Some township supervisors de-
sired to set aside areas which
would be best for business rather
than having commercial es-
tablishments springing up prom-
iscuously in their township.

The vast majority of the coun-
ty area is zoned RA — Recrea-
tion and Agriculture, which has
very few restrictions. This is
designed as a low density area
so the minimum lot size is one
acre. The minimum floor area
is rather small at 400 square
feet which will permit the hunt-
ing cabin and summer home.

Interim means, in between
times. In case of a zoning or-
dinance it means it is an ordi-
nance to fill the gap until a
permanent zoning ordinance can
be developed and adopted. The
advantage of an interim zoning
ordinance is that people have an
opportunity to try the ordinance
for a one year period. Changes
can easily be made to better
adjust it to the needs of the
people before it becomes perma-
nent.

The interim zoning ordinance
can only be enacted for one

year. It can be extended for two
additional one year periods. Af-
ter that it becomes null and void.
A permanent zoning ordinance
must then be adopted if the
county wishes to continue under
a zoning ordinance.

The Apathy of Thanksgiving

EDITOR'S NOTE: The following is an essay written by one of Grayling's students. Name of the school and author withheld by request.

After the Pilgrims came to America in 1621, they suffered a long hard winter. The Indians helped them through that winter and the following summer. They taught the Pilgrims to plant crops that would grow in this cold climate. After the harvest, they all gave thanks to God in return for their crops.

Today, many people think of Thanksgiving as a "turkey" as a "large meal" or as a "meeting of friends and relatives." These are very selfish ideas we should think of Thanksgiving as "giving thanks to God" for the turkey, the large meal and the friends.

This Thanksgiving let's concentrate on giving thanks to God for the turkey and perhaps a gathering of friends.

I BET YOU DIDN'T KNOW

By Bill Schaefer

What are the odds that football teams would win two games and win the team winning by the score and with the same scoring the same winning points? Navy won in 1910 and again in 1911. The score of each game was 3-0. Navy won each of those games by the same score. Jack Dalton of Navy each game by kicking goal for the only one of the games. Navy ever predict that two games could be so close. We take it for granted there will be an Army football game every but did you know that have been years in the Army Navy game? For one year another, there have been breaks in the since it started in 1911. Last time there was a Navy game was 1929. A former President of U.S. was once a coach at a major college. Can you guess who? Woodrow Wilson. He coached football at Princeton in the late 1880's. Copyright
